

Pea Soup's

Micro Rocket

12V DC Portable Smoke Machine

The **Pea Soup Micro Rocket** is perfect for situations where a small amount of smoke is required for air flow tracing, LEV and small scale leak visualisation where no power is available. It is capable of producing a steady stream of smoke, if required, for up to 10 minutes of continuous use on a fully charged battery (supplied), or unlimited use when connected to the optional mains adaptor (a full reservoir of fluid will last approx. 50 minutes). It can also generate small puffs of smoke if required and comes with an optional tube attachment to allow more accurate placement of smoke.. The smoke produced disperses quickly.

The Micro Rocket is compact in size (L 22.7cm x W 6.6cm x H 11cm) and very simple to use.

The unit has switch to allow for momentary fog production, or latching (continuous) output until button pressed again. It is very easy to carry and operate. The fluid tank on the unit is specially designed to allow operation at a wide variety of angles.

The Micro Rocket is an ideal tool to highlight airflow and LEV (Local Exhaust Ventilation) issues that smoke is uniquely capable of revealing.

Kit comprises:

- 1 X Pea Soup Micro Rocket smoke machine
- 1 X 12V DC Battery
- 1 X Battery charger and lead
- 1 X 500ml container of smoke fluid (enough for 250 minutes of fog)
- 1 X Flight/carry case with handle

Optional Extras:

- Mains power adaptor
- Wireless remote control
- Spare battery
- Additional 500ml Micro Rocket smoke fluid

**MICRO
ROCKET**
BATTERY POWERED SMOKE MACHINE

SPECIFICATION

Fog Output:
100 cubic feet per minute

Power Consumption:
75 W

Tank Capacity:
110 ml

Battery (supplied):
12V DC / 2.3Ah

Fluid Consumption:
2 ml / minute (50 mins per tank)
